**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Roberg (5556042 **OR** EP 0631717 A1).

Roberg of both prior art recite the same element, however disclose different arrangement & features for the chopper & blower devices, as best shown in fig 1 (US patent) and fig 9 (EP patent).

In either patent, a supporting structure (vehicle wheels & frame), threshing & separating assembly, cleaning assembly (cl. 4);

The functional recitation of cl. 14, are met by the structure disclosed by the prior art; it is noted that a functional recitation must be expressed as a "means" for performing the specified function, otherwise the intended use of the device does not differentiate the claimed apparatus from the prior art apparatus satisfying the claimed structural limitations.

The claimed features are best illustrated for clarity in the following marked up drawings, first the above mentioned fig 1 and then fig 9 are shown:
